THE POWER OF OUR NOPAL ALOE IS INGREDIENTS WE USE...AND DON'T USE!

The science and research behind the effectiveness of NOPAL ALOE was complex. Prior to developing the product, ProActive Nutra experts researched and identified the beneficial properties of Nopal Cactus thallus and Aloe leaf. They also looked at competitive brands, and their approach. What we discovered was eye opening. In simple terms, we quickly discovered that the effectiveness of competitive Nopal Aloe products were clearly not equal. We identified the factors that created the best results and while doing so, uncovered additional advanced compounds that enhance the effectiveness of Nopal Aloe. We took this knowledge and developed a proprietary product that we feel offers you the best Nopal Aloe benefits on the market today.
