

**DUOCAP™ DELIVERY SYSTEM**

# PREPRO PREMIUM

**PREBIOTIC + 14 PROBIOTIC STRAINS**

## SCIENCE BASED NUTRITION™

Proactive Nutra's 3-stage delivery process enables maximum performance probiotic results effectively releasing a prebiotic and probiotics in specific areas in your digestive system for superior nutrient absorption.

**Stage 1:** PrePro Premium releases a liquid prebiotic into the stomach where it balances the pH in the gut, discourages the growth of unfriendly bacteria, and establishes a path of food for the probiotic.

**Stage 2:** The inner capsule containing PrePro Premium's probiotics is protected from degradation and travels past the stomach.

**Stage 3:** Probiotics release in the Prebiotic-filled small intestine for superior nutrient absorption.

## 14 DIFFERENT STRAINS & STRENGTHS

Proactive Nutra contains 14 different strains of microflora, or friendly bacteria, which help maintain the natural balance of bacteria in the intestines and are specially formulated to cover every aspect of gut flora health. This revolutionary new formula combines a prebiotic and probiotics into one simple capsule, with the benefits of both then delivered to various target areas of the gastrointestinal tract.

### SHELF STABLE

In addition to its broad gastrointestinal benefits, PrePro Premium provides Moisture Defense™, which helps keep moisture-sensitive compounds shelf-stable without refrigeration, unlike many other probiotic supplements.

## Supplement Facts

Serving Size: 1 capsule  
Servings per Container 30

Amount Per Serving	
<b>Prebiotic</b>	
Fructooligosaccharides 95% FOS	53mg *

## PATENTED CAPSULE-IN-CAPSULE DELIVERY SYSTEM

**Prebiotic Release -** A liquid prebiotic is released into the stomach, where it stimulates the growth of healthy bacteria. †

**Moisture Defense -** The inner capsule is protected from degradation and travels past the stomach. †

**14 Probiotic Strains -** The probiotic is released into the intestine where the prebiotic has established a pathway of food for it to flourish. This gives you the maximum rate of bacterial multiplication which provides the highest benefit. †
